## SUMMARY

Front-end web developer leveraging a customer service background to build a more engaging user experience on the web. Recently earned a certificate in full stack development from UC San Diego, with newly developed skills in JavaScript, CSS, React.js, and responsive web design. Known as an innovative problem solver passionate about developing apps, with a focus on mobile-first design and development. With each project, my aim is to best engage my clients for an impactful user experience. I applied aspects of UX and agile development in a recent project. I worked on a team of four to develop a single-page MERN app that helps travelers document the places they have visited. I'm excited to leverage my skills as part of a fast-paced, quality driven team to build better experiences on the web.

## TECHNICAL SKILLS

**Languages:** HTML, CSS, Javascript, React.js, Node.js

**Applications:** Google Suite, Slack, Zoom, Trello

## PROJECTS

**My Trip Journal** | [github.com/jmoniz155/my-trip-journal](https://github.com/jmoniz155/my-trip-journal) | [my-trip-journal2.herokuapp.com/](https://my-trip-journal2.herokuapp.com/)

- Worked on a team of four developers to create a full stack app where the user can signup/login, and track their visited trips.
- Worked on the routing of the app, linking the front end pages to the API routes.
- App was built with Handlebars, Node.js, Express.js, Rest API, CSS, Javascript

**Weather Dashboard** | [github.com/mojikalani/weather-dashboard](https://github.com/mojikalani/weather-dashboard) | [mojikalani.github.io/weather-dashboard/](https://mojikalani.github.io/weather-dashboard/)

- This is a weather dashboard app where the user can search for a city and it will display the current weather as well as the 5 day forecast.
- App was built with HTML, CSS, Javascript, Rest API.
